

MAXI SLIDE

Versatile repositioning sheets

ARJO

...with people in mind

MAKING EVERYDAY TASKS EASIER AND SAFER

Carers spend a large part of their working day transferring or repositioning patients. *Maxi Slide* helps carers to carry out these frequent tasks in an easier and safer way, without the stress and strain associated with manual handling.

Using *Maxi Slide* is a fast and convenient solution for many handling situations including common bedside activities such as moving, turning or sitting up the patient. Routines involving lateral transfers and patient repositioning can be performed safely and efficiently.

Maxi Slide offers a unique range of simple patient handling aids that can improve the quality of care and create a safer working environment for carers. There are many methods you can select when using sliding material and just a few of them are shown here. The use of any method should follow a suitable risk assessment.

Turning in bed

Solution: two *Maxi Slide* Sheets

Moving up the bed

Solution: two *Maxi Slide* Sheets and a *Maxi Tube*
