3.

Calculate the wrist height for your **Rabbit**

Calculate the wrist height on the basis of the total height

$$\frac{A: \text{Total height}}{2} \approx C: \text{wrist height}$$

Choose the correct size of wheels for your **Rabbit**

	Rabbit size 1	Rabbit size 2	Rabbit size 3	Rabbit size 4
Height from foot plate to top of wheel (C: hip height)*, mounted with:				
22" wheel (55 cm)	37-47 cm (14½-18¼")	-	-	-
24" wheel (60 cm)	42-52 cm (16½-20¼")	-	-	-
26" wheel (65 cm)	47-57 cm (18¼-22¼")	47-57 cm (18¼-22¼")	47-57 cm (18¼-22¼")	-
29" wheel (73 cm)	-	50-65 cm (19½-25¼")	50-65 cm (19½-25¼")	-
32" wheel (80 cm)	-	57-72 cm (22¼-28")	57-72 cm (22¼-28")	57-72 cm (22¼-28")
36" wheel (90 cm)	-	-	-	67-82 cm (26-32")

* (C) = Total user height divided by 2. This is the approximate height for the hip and wrist and important for choosing the right size of wheels.

The footplate is in the lowest position: 6 cm above the floor and the wheels are cambered so se a total of 8 cm is subtracted. Example: 22" wheel is 55 cm (55-8=47). For size 1 the foot plate can be adjusted 10 higher (for the other sizes we work with 15 cm for sizes 2, 3 and 4), so we have adjustments from 37-47 cm. The recommended user height for Rabbit size 1 using 22", 24" or 26" wheels will be from 74-114 cm (28¾-44½").
