

AQUATEC

The OCEAN VIP / OCEAN DUAL

The OceanVIP or OceanDual with Recline Back

The next wave in comfort and style, Aquatec's OceanVIP tilting shower chair is height adjustable, for easier transfers or toilet clearance. OceanVIP provides correct posture for your hygiene needs with tilt-in-space or recline positioning choices. Recline positioning now available on OceanDual or with the optional back support for your existing OceanVIP.

Features

- Stainless steel frame
- Seat height easily adjusted from 19.5" to 25.5" from floor
- Adjustable headrest
- Adjustable, machine washable back upholstery
- 5" casters with locks
- Height adjustable, flip-up armrests

Components

OceanVIP is built on a stainless-steel frame with corrosion-free components. The seat is waterfall style with a hygiene cut-out for comfort. Soft overlays give you seating choices for toileting or showering. Two stainless-steel gas springs will lift 330 pounds. Adjustable seat height is set with easy-to-move clips. Footrests can be lengthened easily with locking pins and include tilting footplate and heel loops. The back upholstery has 5 buckles to adjust tension for seating comfort.

OceanDual, with reclining back support, provides even greater seating and positioning possibilities. The angle between the reclining backrest and seat is infinitely adjustable from 10° to 50° for a total angle of 85° for the complete chair. The operating lever locks to avoid unintentional angle movement. A pair of anti-tippers is included with this back option.

The OceanVIP rolls smoothly on 5" casters. Three wheels have a foot activated brake and one rear wheel has direction lock for straight line travel. A handle on the back push bar sets the tilt from 0°-35°. Armrests flip-up for side transfers and can be positioned at two heights. Optional arm locks are available.

Warranty

OceanVIP shower commode chair has a limited two year warranty against manufacturer's defects, excluding soft seat and upholstery. The optional reclining back support has a limited two year warranty against manufacturer's defects. Cylinders are warranted for one year.
