## eakin® Cohesive® PASTE

The **alcohol-free**, non-sting<sup>1</sup> adhesive paste for use in ostomy, wound & fistula care

## SIX GREAT REASONS TO USE eakin® Cohesive® PASTE

eakin Cohesive® PASTE is a stoma paste with a difference.  
It is an **alcohol-free** paste with the following **key benefits**:

### 1. SKIN FRIENDLY

Like all eakin products, eakin Cohesive® PASTE contains **no alcohol** in its **non-sting** formulation.<sup>1</sup>

It is a skin friendly product that could be used even on **sensitive skin**, including babies, to help prevent skin irritation.

### 2. HELPS PREVENT LEAKAGE

The use of eakin Cohesive® PASTE aids **leakage prevention** by helping to form a waterproof barrier around the stoma.

It also **absorbs more moisture** than competitor pastes<sup>2</sup>, helping to prevent skin maceration.<sup>3,4,5</sup>

### 3. QUICK & RELIABLE

Due to the absence of alcohol eakin Cohesive® PASTE will **not dry out**.<sup>6</sup> This enables a **quicker pouching regime** as you can apply the pouch immediately - there is no need to wait for the paste to dry before application!

### 4. HELPS TO HEAL

The use of eakin Cohesive® PASTE can help to **heal red and irritated peristomal skin**.<sup>7</sup>

### 5. COULD INCREASE POUCH WEARTIME®

eakin Cohesive® PASTE is used to fill all crevices, skin folds and scars in order to create an **even pouching surface**.

By creating an optimal pouching surface this improves the likelihood of good adhesion and helps reduce the risk of leakage, thereby increasing pouch weartime.

### 6. PART OF THE EAKIN COHESIVE® FAMILY

eakin Cohesive® PASTE can be used in conjunction with all eakin products. It is based on the same Cohesive® formulation which is found in **eakin Cohesive® seals** and **eakin Fistula and Wound Pouches™**. Part of the eakin Cohesive® family of products that have been protecting peristomal skin for decades.

### IN A MARKETING EVALUATION OF 59 PASTE USERS:\*

- 92%** rated eakin Cohesive® PASTE better than or the same as their current product in terms of **improved skin condition**
- 82%** found eakin Cohesive® Paste **easier to remove** (or the same as) their current paste
- 86%** of respondents found eakin Cohesive® Paste more **comfortable**, or as comfortable as their current product
- 78%** rated eakin Cohesive® Paste better than or the same as their current paste in terms of **pouch security**
- 77%** found eakin Cohesive® Paste achieved **greater pouch weartime** or the same weartime as their current paste
