

# Etac shower stools

Neat and practical shower stools in most shapes and heights

 **etac**<sup>®</sup>

# Etac has a stool for everyone – which model suits you?

Most activities in the bathroom are really best carried out sitting down. This is not only because it is easier and safer, but it is actually more comfortable.

## Stable, safe and comfy

Etac offers a wide range of shower stools designed to assure maximum comfort and safety. Their soft, round seating surfaces make sitting comfortable and their outer design while specially shaped holes effectively drain excess water from the stool. The legs are angled outwards to maximize stability irrespective of height. All stools are equipped with Etac's special design ferrules that reduce the risk of slipping on wet floors. The seats can easily be machine washed for convenient cleaning.

## A stool for every bottom

Our range of stools includes a wide range of shapes and heights, and offers a solution to every need. Which one suits you best?

*With its classic rounded seating area, the Etac Easy suits all needs and environments. The rounded design means that it is possible to sit on the stool from any direction.*

*Etac Edge is our smartest stool. It takes up little space due to its triangular shape and fits into restricted shower corners. Users can straddle the stool seat with its large seating area providing increased stability. It is also a good choice for relieving aching hips: by slightly lowering one leg and straddling the seat with the lower leg pointing forward, the seat angle is opened to relieve aching hips.*

*The Etac Smart's rectangular seat offers a narrower or wider seating area and therefore suits all bottoms - even those that require a little more room. Its corners make it easy to straddle the seat for extra stability. Smart is available as a lower and a higher height-adjustable model, with the lower Smart model being easy to place in a bath for use as a bath stool.*

*Etac Smart and Easy are also offered with a swiveling functionality for increased mobility when seated. Users do not need to rise up from the stool in order to circle around it, making the seating safer and less prone to accidents.*

## Etac shower stool details

### Secure height adjustment

There is no risk that the stool changes height when in use due to the secure push button. Also there are no loose parts for the height adjustment.

### Easy to assemble

The Etac shower stools come flat-packed and are easy to assemble in seconds without any tools. All stools are designed for foolproof mounting.

### Comfortable and safe seats

The concave seats are comfortable to sit on. The flexibility in the leg fixture entails that the stools can handle any weight displacement which can occur when you move your upper body.

### Stability

The legs of the stool are angled outwards to increase stability. The soft ferrules adjust perfectly to the floor.

*Etac Smart can also be used in the bathtub where it provides a stable and comfortable seating.*

## Etac shower stool soft seats

Makes the seat comfortable, warm and non-slippery. Can be wiped dry after usage. To be snapped onto the seat.
