

EVA Support Walkers™

Sometimes referred to as a “Cardiac Walker”. The Eva® Walker supports the patient’s weight when exercising. Good for Post-op patients when early walking exercise is indicated. Easily adjustable to suit different patient heights. The padded, molded arm pads have a sculpted forearm cutout to keep the arms from sliding off the pads. The arm pads can be removed and are easily cleaned; making it ideal for institutions with a variety of users. Handgrips are a more comfortable round shape and are forward facing, providing a better and more ergonomic grip. Welded steel frame with baked epoxy enamel finish. Non-marring casters with step on wheel locks on the rear casters. Length of adjustable padded armrest is 17 1/2”, and 6 1/2” wide. Width between the armrests can be adjusted from 12”- 19” wide. Step-on locking brakes on two casters.

Adult Pneumatic adjusts from 35 1/2” - 51 1/4” (89/129cm) which should accommodate someone up to 6’5” tall. The easy to release lever mechanism is conveniently located under the front armrest support frame. This unit is ideal when being used with a wide range of patients with it’s easy height adjustment. Includes Standard Handgrips. Weight capacity - 333 lbs.

Youth Manual model features: Height manually adjusts from 26 1/2” - 38” (67.5cm - 96.5cm). Width between armrests adjusts from 11” - 19” (28cm - 48.2cm). Overall width is 26 1/2” (67.4cm). Overall length is 31” (78.8cm). Step-on brakes on two casters. Caster diameter is 3” (7.6cm).

Directional Casters align the rear casters to track in a straight line to assist the user in controlling the direction of the EVA Walker. Step ON for directional tracking / Step OFF unlocks the directional tracking. NOTE: Caster locks are only on the front casters on models with Directional Casters.

HOME style is for narrow hallways and doors found in the average home.

HOSPITAL style provides a wider entrance for wheelchair use needed by most medical institutions.
