

Activity Sling

Head Support
Child/Teen Sizes
Shoulder Pads

The Activity Sling is designed to help children or young teens with gait training or rehabilitation exercises. The Activity Sling is made of a Polyester Net and has an extended back side to support the neck and head while moving.

Comfortable

The Activity Sling features elasticized straps on the sides for maximum flexibility during movement. With added head support and comfortable shoulder padding, it allows for more comfortable and confident movement. The Activity Sling is designed for 2-point suspension and can only be used with an overhead ceiling lift.

elasticity which allows it to move with the patient and the “pant” style design ensures the sling will not slide up. The Activity Sling is applied in the supine position.

Easy Care and Easy Fit

Our slings are manufactured to the highest quality standards. They feature reinforced straps and high strength nylon webbing around the sling to make them strong enough to resist even the most active use. Each sling label is colour coded to ensure quick and easy selection of the correct sling and the straps are colour coded for easy determination of required positioning.

Versatile Design

The Activity Sling is designed to offer support for both the upper and lower body, however, the user must have some body control in order to move, balance and walk while doing gait training or rehabilitation exercises. The soft, breathable Polyester Net fabric has some

Accessories
