Encouraging a natural standing posture with improved function is as easy as 1-2-3

1. **Stander**
   - Mygo Stander offers continuous angle adjustments from vertical to 10 degrees from horizontal. Through the adjustment of the knee and foot supports, Mygo Stander can also accommodate up to 25 degree fixed hip and knee contractures.

2. **Sizes**
   - Available in two sizes to accommodate ages 4-14.
   - **Size 1**
     - 4-10 years
     - Shown in Prone
   - **Size 2**
     - 8-14 years
     - Shown in Supine

3. **Configurations**
   - A 3-in-1 stander offering prone, supine and upright standing in one product. The Mygo Stander provides clinicians with the tools to maximize posture and positioning.
   - **Trunk Support**
     - The wings on the contoured shoulder support can be angle adjusted to provide shoulder protraction. This brings the hands to midline which increases upper limb and hand control for improved function.
     - The ergonomically designed chest pad replicates the shape of the rib cage allowing the shoulder girdle to freely protract and retract in prone standing, improving upper body function.
   - **Pelvic Stability**
     - The pelvic derotation belt enables the therapist to position the client’s pelvis in a central and neutral position with minimum effort.
   - **Leg & Foot**
     - The angle of the knee and foot supports relative to the hip and chest supports can be adjusted by 25° to accommodate contractures. The footplates can also be adjusted individually to accommodate up to 10° plantarflexion or dorsiflexion.
