

Power assist PushTracker E3

Use the listed steps for quick setup, with no WiFi/phone required →

permobil

E3SM2-QSS Rev. A

- 1 Turn on your PushTracker E3 by holding down the button on the side. Follow the prompts on the screen for the Wear OS by Google tutorial.

Product images may vary

- 2 Turn on your SmartDrive. Touch the “SmartDrive MX2+” button on the screen to open the app. Wear the device or cover the sensor on the back to proceed.

- 3 Touch the “Turn Power Assist On” button to pair/connect your SmartDrive. Phone permissions are required to pair/connect the devices, not to connect/manage a phone. Read the prompts for details and accept the permissions.

- 4 Select the SmartDrive that appears on the screen. You know it's connected when the outer border on the screen is blinking blue.

- 5 Touch “Turn Power Assist Off”, then swipe up until you see the menu. Select your language and open/adjust settings prior to first time use.

- 6 Practice using your SmartDrive to help improve the overall experience. Learn more (e.g. practice tips, setting the time)
