

Casting Roll Form Splints

McKesson Rolled Form Splints are composed of layers of knitted fiber glass fabric coated with a urethane resin that hardens when exposed to water. These layers of coated fiber glass are enclosed within a polypropylene nonwoven padding. The complete splint is then sealed in a moisture/air proof foil patch. All-in-one design allows for easy application and time savings. Included clip on end of roll helps preserve product between uses.

Features and Benefits

- Minimal water needed to activate
- No wrong side application
- Double-sided, stretchable polypropylene padding
- Padding can be easily opened to cut for a custom fit
- Center stitching of seven layers of fiberglass to maximize lamination
- Cost effective; cuts to exact length needed, eliminating waste
- Resealable clip helps preserve product between uses
