

Custom Position PlusTM

Wheelchair Cushion or Wedge

Thank you for ordering a Skil-Care **Custom Position PlusTM** Cushion or Wedge. The unique gel-pod construction promotes proper positioning by reducing forward sliding and lateral leaning. Designed as a total seating system, **Position PlusTM** each Cushion Wedge provides stability and comfort, relieves interface pressure, and prevents skin-damaging heat build-up. Manufactured for durability, the enclosed cushion or wedge will support a wheelchair user weighing up to 500 pounds.

● **FRONT POD** controls sliding. The wheelchair user's weight displaces some of the gel forward to form a low-profile thrust barrier that prevents posterior pelvic rotation. Thrust barrier is available in one-, two-, and three-inch heights to accommodate user's slide control needs.

● **FIRM FOUNDATION** (For sling-seat wheelchairs only.) Eliminates hammocking that causes inner-thigh rotation which encourages sliding.

● **TWO-WAY STRETCH CLOTH COVER** reduces skin shearing. Removes for laundering.

● **WATER-BASED GEL** reduces interface pressure and moves with wheelchair user to provide an alternating pressure effect. Gel's endothermic quality cools the skin to prevent perspiration and the skin breakdown caused by moisture.

● **FIRM FOUNDATION** (For sling-seat wheelchairs only.) Levels wheelchair seat for better weight distribution and pressure reduction.

● **REAR POD** provides additional slide control. A small portion of the gel moves forward as the wheelchair user begins to slide. This creates a wedge effect that aids in slide control.

● **SIDE PODS** improve lateral stability. Left or right leaning is controlled by the outward gel displacement that forms stabilizing wedges at the wheelchair user's sides.

● **SAFETY STRAPS** secure to chair and prevent cushion from slipping off seat

● **INCONTINENT-PROOF INNER COVER** prevents urine from migrating into the cushion. **Factory-sealed vinyl cleans and disinfects easily.**

● **HIGH-DENSITY FOAM** beneath the gel increases comfort and stability.

Important Safety Notice The Position Plus Slide-Guard Cushion's safety straps must be secured to the wheelchair to prevent the cushion from slipping off the wheelchair seat.

Cover Care Instructions The vinyl inner cover may be cleaned with a spray-type cleanser. The cloth outer cover may be removed for laundering. Do not launder or dry cloth covers at temperatures that exceed 180° (82°C). Do not use bleach.

You Ordered:
