

# buddy

## Supportive and affordable standing

Smirthwaite's new stander, the Buddy, is an entry-level vertical stander. Designed for younger children (please use technical data for sizing) who require low to moderate levels of support while weight bearing. Its design allows it to be used as a hip stander suitable for targeted therapy for the development of specific areas such as trunk and shoulder girdle stability and head control.

## Inclusive and accessible

The Buddy stander is slimline so it can be used in schools, enabling your child to perform numerous activities without feeling isolated from friends. Its color and friendly character also brightens up any room. With the economic cost we are delivering an entry-level stander that is an accessible option to everyone.

## Adjustability

The Buddy stander offers numerous height and width adjustments in the chest and pelvic bands as well as additional angle adjustments in the knee supports and sandals. The Buddy size 2 has an additional height adjustment for taller or faster-growing children.

## Buddy stander technical data
