

# MID CONTOUR CUSHION

The Mid Contour Cushion (3" cell height) is recommended for individuals who require a cell height that provides a high level of tissue protection and treatment while offering greater ease in transfers in and out of the cushion. The Mid Contour cell height has proven to be ideal for the pediatric client, providing deep immersion for high levels of tissue protection and treatment along with lower cell height for the pediatric frame.

3" cell height  
HCPCS CODE - K0734

HCPCS CODE - K0736 Dual Valve

HCPCS CODE - K0736 Four Valve

3" cell height with cover

- 3" high cell is recommended for those individuals who require deep immersion for tissue protection and treatment, but prefer the lower cell height for basic daily activities. Ideal for the pediatric client.
