

# Meridian™ Wave™

The dual-chambered adjustable Air-Foam Floatation skin protection cushion with on a solid positioning base—available in three styles.

SEATING SYSTEMS

# Meridian™ Wave™

At VARILITE, innovation means superior solutions like our new Wave Series, a family of contoured bases for positioning support. Therapists can now combine the dual-chambered Meridian adjustable Air-Foam Floatation skin protection cushions with a solid positioning base.

Three different Wave designs are available: CPW (Contoured Positioning Wedge), LPB (Lateral Positioning Base), or CPB (Contoured Positioning Base).

- lateral thigh support to prevent thigh abduction
- medial thigh support to prevent thigh adduction

- lateral pelvic support to maintain pelvis in center of seat
- lateral thigh support to prevent thigh abduction
- solid base of support for postural stability

- lateral pelvic support to maintain pelvis in center of seat
- lateral thigh support to prevent thigh abduction
- medial thigh support to prevent thigh adduction
- solid base of support for postural stability

## VARILITE Wave Positioning Support Comparison Chart

	Lateral Pelvic Support	Posterior Pelvic Support	Lateral Thigh Support	Medial Thigh Support	Firm Base of Support
CPW (Contoured Positioning Wedge)			•	•	
LPB (Lateral Positioning Base)	•	•	•		•
CPB (Contoured Positioning Base)	•	•	•	•	•

Each Wave positioning support fits securely beneath the Meridian cushion. Both cushion and Wave positioning support fit inside the tailored Meridian Wave cover.

### Meridian Wave Series are available with the following options:

- Cover: Mesh or Incontinence
- Base: CPW, CPB, or LPB

See price list for size availability and HCPCS coding.

# Meridian™ Wave™ Series

Each Wave Design Enhances the Positioning Properties of the Meridian

## Meridian Wave CPW (Contoured Positioning Wedge)

Meridian Wave CPW provides exceptional pelvic and lower extremity positioning for enhanced sitting posture.

### 1. Wave Contoured Positioning Wedge

Lateral thigh supports position the lower extremities and prevent unwanted abduction of the thighs. Medial thigh support provides the correct amount of abduction to prevent unwanted adduction of the thighs. The Wave CPW increases the weight-bearing load on the back of the thighs and decreases the load on the buttocks, without changing the seat-to-back angle. The closed-cell foam CPW will not absorb fluid and is resistant to bacteria.

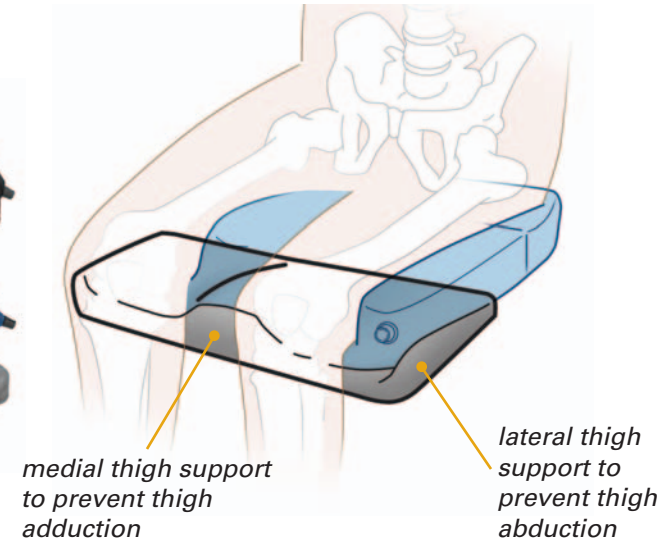

### 2. Air-Foam Floatation Cushion

### 3. Thigh Chamber

### 4. Pelvic Chamber

## Meridian Wave CPW

## Meridian Wave LPB (Lateral Positioning Base)

Meridian Wave LPB provides a solid base of support and a high degree of pelvic and lower extremity lateral positioning.

### 1. Wave Lateral Positioning Base

Lateral pelvic supports, located posterior to the greater trochanters, provide lateral stability that maintains the pelvis in the center of the seat. Lateral thigh supports position the lower extremities and prevent unwanted abduction of the thighs. The Wave LPB provides a firm foundation for postural stability and discourages chair upholstery from slinging. The closed-cell foam LPB will not absorb fluid and is resistant to bacteria.

### 2. Air-Foam Floatation Cushion
